NEW MONOGRAPH «PANCREATOLOGY IN THE ART»

Y. V. Dumansky, N. B. Gubergrits

Donetsk National Medical University n. a. M. Gorky, Ukraine

Key words: pancreas, pancreatology, art, anatomy, physiology, pathology

Book is devoted to reflect in the masterpieces the history of pancreatology, images of outstanding scientists, anatomists, physiologists, clinicians, surgeons, physicians, oncologists, endocrinologists — those who had dedicated their lives and work to the study of the pancreas. Authors presented works of fine art (painting, sculpture), used numismatics, faleristics, philately, architecture, book illustrations and pictures of surgical instruments, made by skilled masters. Aphorisms on the pancreas, pancreatitis, treatment are given; literary, musical works are referred.

Monograph will be useful for the students of medical universities, interns, general practitioners, physicians, surgeons, oncologists, gastroenterologists, endocrinologists, historians of medicine.
